

INNOVATE FOR THE FUTURE

HERE COMES NORTH AMERICA'S FIRST GENERATION OF ECO-FRIENDLY TRAILERS.

Idéal Cargo introduces EVOCORE, a new trailer series combining a tradition of performance with ecological innovation. By integrating GreenEdge Technology with our legendary fully hot-dipped galvanized structure, we were able to create a trailer unrivaled in the American market. Strong, lightweight, and durable, the biocomposite panels used to construct the roof and walls of each trailer have allowed us to significantly reduce our environmental footprint without compromising the quality of our product. Indeed, we recycle 6,500 plastic bottles per unit manufactured, thus contributing to an economy that reflects our brand: solid and durable.

WHETHER YOU HIT THE ROAD FOR WORK OR LEISURE,
INVEST IN THE FUTURE.
JOIN US ON THE PATH OF INNOVATION.

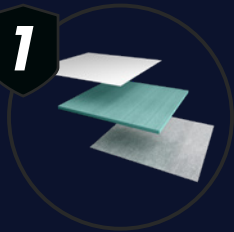

**BE PART OF
THE CHANGE**

FIVE ELEMENTS THAT MAKES EVOCORE **A ONE OF A KIND TRAILER** **ON THE MARKET**

1

Its shell, made of biocomposite GreenEdge panels, allows for the average recycling of 6,500 plastic bottles per unit manufactured. Additionally, the roof and walls are equipped with R5 level insulation.

2

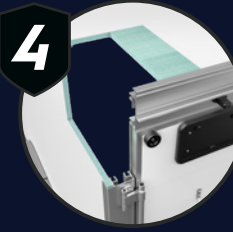

Its floor structure is made of hot-dipped galvanized steel, while the walls and roof frames are equipped with heavy-duty aluminum extrusions.

3

Both the interior and exterior finishes allow for fully customizable organizational and aesthetical design.

4

The roof, assembled using aluminum extrusions, offers high resistance to weight and thermal fluctuations.

5

The heavy-duty aluminum rear frame is reinforced with galvanized steel squares. These two components are held together with galvanized steel bolts.

ALL THE FEATURES YOU'RE LOOKING FOR **REUNITED IN ONE TRAILER!**

Whether you are looking to safely transport your motorized vehicles or your working equipment, or perhaps to create a mobile workshop, the EvoCore series trailers are specially designed to meet your requirements.

- » ULTRA-resistant GreenEdge biocomposite panels, equipped with R5 level insulation.
- » Interior and exterior high-performance LED light systems.
- » Wiring design resistant to bad weather conditions, capable of performing in temperatures as low as -40 °C.
- » Triple tongue with adjustable coupler & 7,000 lbs galvanized steel trailer jack.
- » ULTRA-STURDY non-slip floor.
- » Hot-dipped galvanized steel rims and premium radial tires.
- » Hot-dipped galvanized steel floor structure with 10-year warranty (TA3 & less).
- » Solid aluminum extrusions assembly for an unparalleled durability.
- » Unrivaled aesthetics with endless customization possibilities.
- » Aluminum hardware.
- » Crossmember every 16 inches (TA3 & less).
- » Standard slide suspension with the option for a torsion axle.

WORKZONE

TRAILER

Single side door with double rear door, and aluminum hardware.

SPORTZONE

TRAILER

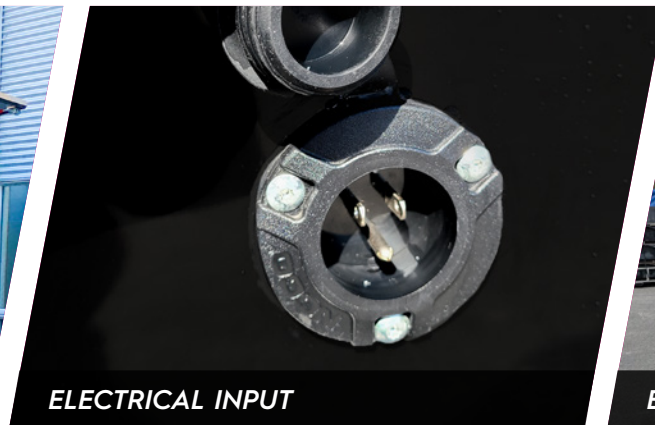

Single side door with back ramp door; 1,200 lbs capacity (option for 4,500 lbs), and four floor anchors included.

MEETING YOUR **EXPECTATIONS**

We are aware every need is unique. That is why we offer you, along with all the must-have features, a wide range of options to ensure your trailer is the best purchase of your life.

Customize your trailer by adding one or many of the following features.

CONTRACTOR KIT

CHROME STRIP

STONE GUARD - 48 INCHES

THOUGHT AND DESIGNED **OTHERWISE** FOR THE FUTURE

BE PART OF **THE CHANGE WITH US**

When you turn to an ecologically-innovative product such as the GreenEdge biocomposite panel, you not only make a tangible contribution to the environment, but also take a step to a more sustainable economy, a direction Idéal Cargo is committed to reaching.

WHY DID WE CHOOSE THE GREENEDGE BIOCOMPOSITE PANELS:

They allow us to recycle plastic bottles.

They help to significantly reduce our environmental footprint.

Their high impact resistance is a major asset.

They naturally provide good thermal and acoustic insulation.

Their lifespan is unequalled.

They impart lightness, aesthetic appeal and robustness to our trailers.

A REAL ENVIRONMENTAL COMMITMENT

TIME DEFYING WARRANTIES

**OUR TRAILERS ARE DESIGNED AND BUILT ON
SOLID FOUNDATIONS, ENSURING A LASTING
INVESTMENT FOR THE LONG HAUL.**
