IDÉAL CARGO

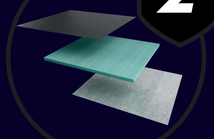

THE 8 ADVANCES
THAT PUT US HEAD AND SHOULDERS OVER THE COMPETITION

1

The walls and roof ar made of robust **GreenEdge** biocomposite panels, without joints.

2

The floor is made of ULTRA resistant non-slip panels.

3

The trailer's interior and exterior finish feature a unique, unrivalled aesthetic.

4

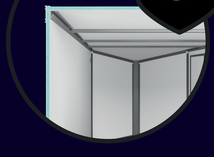

GreenEdge biocomposite panels are made from **100% RECYCLED** materials. Average of 6,500 plastic bottles recycled per trailer manufactured.

5

GreenEdge biocomposite wall and roof panels are assembled with a solid aluminum extruded structure exceeding the **DURABILITY STANDARDS** of any other trailer on the market.

6

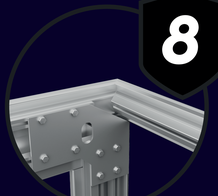

GreenEdge technology ensures that your trailer is already R5 insulated.

7

The floor structure is made of 100% hot dip galvanized steel. The framing of the walls are made of aluminum extrusions.

8

The rear is made of a **HEAVY-DUTY** aluminum extruded structure reinforced with galvanized steel gussets.
